

Dear Mr. Powell:

I live on the southern Oregon Coast, where I can not get local Radio, Television or DSL/Broadband computer connection. I am a listener to XM-Radio. What those of us who live in rural areas is greater access rather than limiting our options even further. Because I can not receive local TV stations I had to go to DISH Network to be able to watch TV and the local weather/traffic choices I have are those in Los Angeles, CA. This is over 800 miles away. I can not obtain local radio channels unless I drive 15 miles south. However, I can obtain XM-radio. Please do not limit my availability.

Sincerely,

Terry Brayer
